

Dear All,

I can describe VIC HOLDING GROUP as the best integrated international surveyor I have ever dealt with. Their origins are Italian but are truly international in their scope and approach.

Their real time reporting and attention to detail is quite first class and have taken surveying into the 21st century.

If you are interested I would recommend that you make personal contact with the founder and president, Alessio Bisutti

website: www.vicworldwide.com

Best regards

American Iron & Metal
